

AIM

To design and develop an ATS (Applicant Tracking System) friendly resume using basic HTML, ensuring clean semantic structure, proper heading hierarchy, and machine-readable formatting without relying on complex CSS/JS elements that ATS parsers typically fail to read.

DESCRIPTION

ATS software scans resumes for keywords, structure, and formatting before a human ever sees them. Resumes built with tables, images, columns, or heavy styling often get misread or rejected by these systems. This task focuses on building a resume using only basic, semantic HTML — proper use of tags like <h1>–<h3>, <p>, /, and <section> — so that the content remains linear, readable, and parsable. Key sections typically include Name/Contact Info, Objective/Summary, Skills, Education, Projects, and Experience, each marked up with appropriate heading and list tags to preserve logical structure and improve ATS compatibility

<h2>Technical Skills</h2>

- Python
- Java
- Html
- Node.js
- MongoDB
- CSS

<hr>

<h2>Work Experience</h2>

<p>1. Intern at Deloitte</p>

- Worked as an intern at Deloitte for 3 months
- Developed new projects in the company
- Led the team

2. Intern at Infosys

- Worked on software development projects.
- Gained industrial experience

Projects

Project	Technology	Description
Library management system	MongoDB, Express, React, Node	Book record management app
Student Management System	Java, MySQL	Desktop application for managing student

Certifications

- ML FOUNDATIONS
- Python Programming
- Full Stack Web Development

Strengths

- Problem Solving
- Teamwork

```
<li>Adaptability</li>
<li>Time Management</li>
<li>Analytical Thinking</li>
<li>Critical Thinking</li>
